(FRONT/Outside)

11 x 8.5

This template is set up with standard 1/8” bleed and 3/16” safe area. Please keep all live content within the green 3/16” safe area to ensure that it is not lost when document is trimmed or folded. All elements of document should be in CMYK at 300dpi for best print quality.

Blue line is where the document will fold. Red line shows where all background content should be pulled out past the document edges to ensure that each image prints past the document size.

This document has been set up using the Master pages & the Layer pallet so that the template cannot be altered unintentionally. Do not embed links, always package InDesign documents before submitting to the printer.

Delete or turn off this layer before submitting artwork.
